## OVERVIEW

Junior Software Engineer who specializes in building apps for browsers and mobile devices; aspires to build creative solutions to challenging problems faced by people all over the world.

## EXPERIENCE

### Maza Group, Newtown, PA — *Frontend Web Engineer*

JUNE 2017 - NOVEMBER 2017

Worked with numerous clients to adapt their brand identities for the modern web and mobile app landscape. Authored storyboards and wireframes using Sketch, designed and implemented e-commerce solutions with Wordpress, and developed the frontend of web applications with the React ecosystem. Gained experience managing client expectations, establishing pragmatic deadlines, and conducting productive feedback sessions to ensure high-quality deliverables.

### Conxsoft Inc., Newtown, PA — *DevOps Intern*

AUGUST 2016 - JUNE 2017

Tasked with documentation and modernization of application deployment and local development infrastructure built on VMWare/VSphere and Docker. Wrote a production monitoring system using Twilio's Java API for Amazon AWS cloud deployed web applications. Documented and contributed to cloud service migrations and account management.

## EDUCATION

### Kutztown University, Kutztown, PA — *Computer Science*

SEPTEMBER 2015 - MAY 2016

Took introductory courses in Discrete Mathematics and Systems Programming. Pursued interest in mid-century sociology and american literature. Developed a fascination for mathematics through music. Left school early to pursue career aspirations in music composition and production.

## AWARDS

### Kutztown University STEM Scholarship Recipient

SEPTEMBER 2015

Received upon admission to Kutztown University in recognition of pre-collegiate academic excellence. Inducted into a tight-knit community of aspiring scientists and engineers who meet once every fortnight.
